THE WOMAN WITH THE HOE

The familiar, age-old saying tells us there is a time for everything, and just now there is no doubt that the time has come to shoulder the hoe and cultivate the land. Women as well as men are joining the great army of the soldiers of the soil for which the country calls, for this is one of the ways in which we are urged to "do our bit" in giving helpful service.

Women who are seriously taking to farming and gardening have had to decide on suitable clothes to work in. They have adopted practical overalls and simple uniforms consisting of a short skirt and a plain, practical waist.

Equipped for Outdoor Work With Overalls and Sun-Hat

When we talk of overalls, however, it does not mean that we must give up all those fascinating summer clothes we have been planning to wear just as soon as the weather would be warm enough to allow us to indulge in them. For, of course, there will still be times to dance, and then we shall wear those ravishing frocks of net and organdy, chiffon and tulle, and those other airy nothings which are so necessary to the happiness of women. Then, too, there will come the times to play when we shall revel in those wonderfully attractive sports clothes with gay striped and plaid skirts and the smart belted middie blouses.

But, to go back to the overalls. Whether women are really going to devote a great deal of time to farming in earnest, or whether they are simply going to cultivate the small plot in the backyard to raise the vegetables for the family supply, an overall suit is the thing to get.

The sketch shows a suit of very practical overalls. This is the kind that is worn with any separate blouse, the top of the overalls being made in jumper effect. The bloomers are roomy and comfortable. They are gathered at the lower edge and securely tucked under the tops of the high lace shoes, which are the correct shoes to wear for gardening. No dirt or twigs will get in and make the feet uncomfortable when the bloomers are arranged in this way with the shoes laced up over them.

Some overalls are made all in one with waist and sleeves sewed in, forming a complete costume which eliminates the necessity of wearing a waist underneath. This style is preferred by some women.

The overalls illustrated have been adapted by the National American Woman Suffrage Association whose members use them in the agricultural department.

There is a growing demand for overalls for women since the agricultural field has been opened up to them as it never has been before; but not alone for this purpose are the overalls used. In many factories skirts have been discarded and the women workers have donned overalls, as they have been found much more satisfactory than the handicapping skirt which is often the cause of accidents.

Women in the home are also taking

to overalls for performing the rough duties about the house. When used for this purpose, they are usually made up in the lighter materials such as percale, chambray and gingham.

Hard Off Freckles With a Sun-Hat! While women are cultivating the soil, they surely do not want to be cultivating freckles as well, so the gardening outfit is not really complete without a sun-hat or a sunbonnet to protect the head. An excellent type of sun-hat with a brim which may be rolled up or down is shown with the overalls illustrated. This is just as essential to the gardener as the hoe, rake or spade, not to mention the important overalls. The overalls and hat are usually made of the same material and one of the most practical materials to use is khaki or heavy khaki-colored

A Practical Costume Consists of a Plain Waist and Short Skirt materials. This color is the best to use for the obvious reason that it does not show the dirt as much as any other. Women's overalls are also made up in blue jean that practical fabric which has always been used for men's overalls.

Another very practical costume in use now for outdoor work consists of a tailored shirtwaist and a short khaki skirt with bloomers and detachable leggings. The illustration above shows this costume. The waists are made of heavy linen, percale, madras, poplin and all practical shirting materials. The skirts are provided with large pockets, not merely a fashion feature, but decidedly utilitarian.

Dr. Brintnall was called and dressed his wounds, which were not serious. The man was kept in the lockup until morning, when he proceeded to some unknown place. Our little town has been much annoyed by tramps of late. We think they should be moved in a hurry.
